7. Any other suggestions for overall syllabus improvement:

- The syllabus is really old and the industrial requirements as of now are way different.
- Increase activities that improve practical knowledge rather than theoretical knowledge.
- Career oriented learning.
- Programming labs should clearly explain why we're doing them and what we're learning. They should be practical, interesting, and relevant so that CS students gain real experience, understand concepts better, and confidently apply their skills in real life.
- More programs should be involved for improving the industrial knowledge of students.
