Workshops

workshop is an interactive and collaborative learning session designed to enhance participants' understanding of a specific subject or skill. The primary goal is to provide participants with a hands-on, practical experience that complements theoretical knowledge.

Purpose:

Skill Development:

Workshops aim to develop practical skills relevant to the academic or professional context. This could include research methods, data analysis, writing techniques, or any subject-specific skills.

Interactive Learning:

Unlike traditional lectures, workshops emphasize participant engagement. They often involve activities, discussions, case studies, and other interactive elements to reinforce learning.

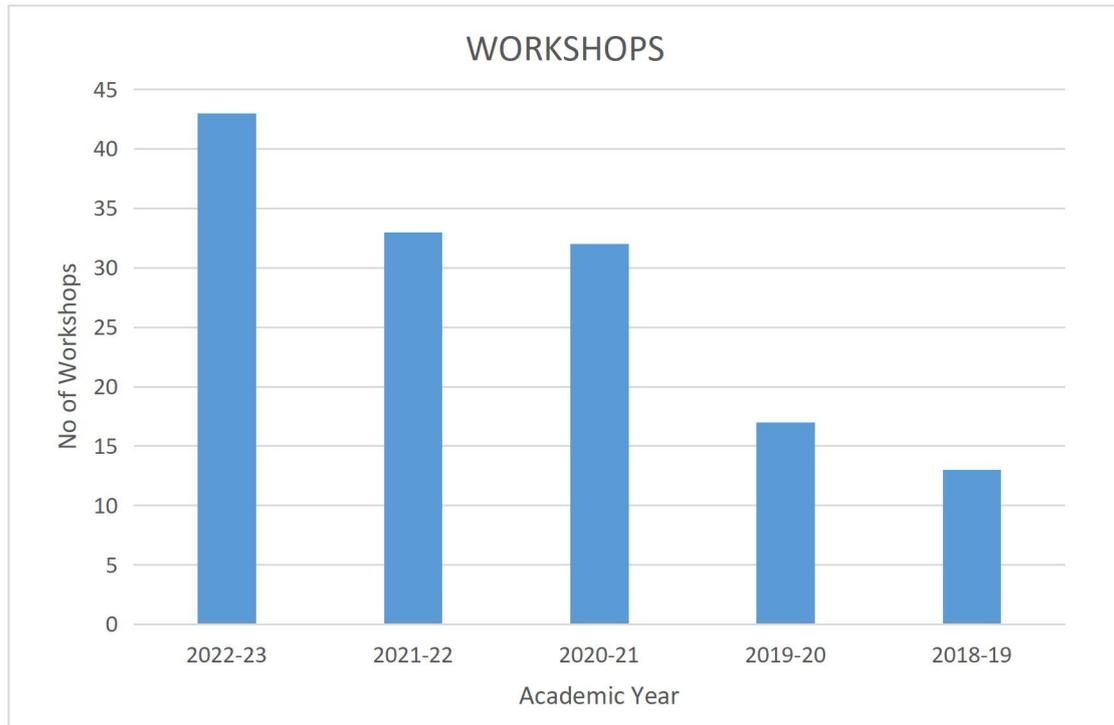

Application of Knowledge:

Workshops bridge the gap between theory and application. Participants are encouraged to apply the knowledge gained during the workshop through hands-on exercises or projects.

Collaboration and Networking:

Workshops provide a platform for participants to collaborate with peers, share ideas, and build professional networks. Group activities foster teamwork and a sense of community among participants.

Report on value added course

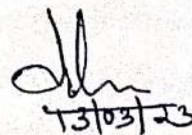

“Fundamentals of Python”

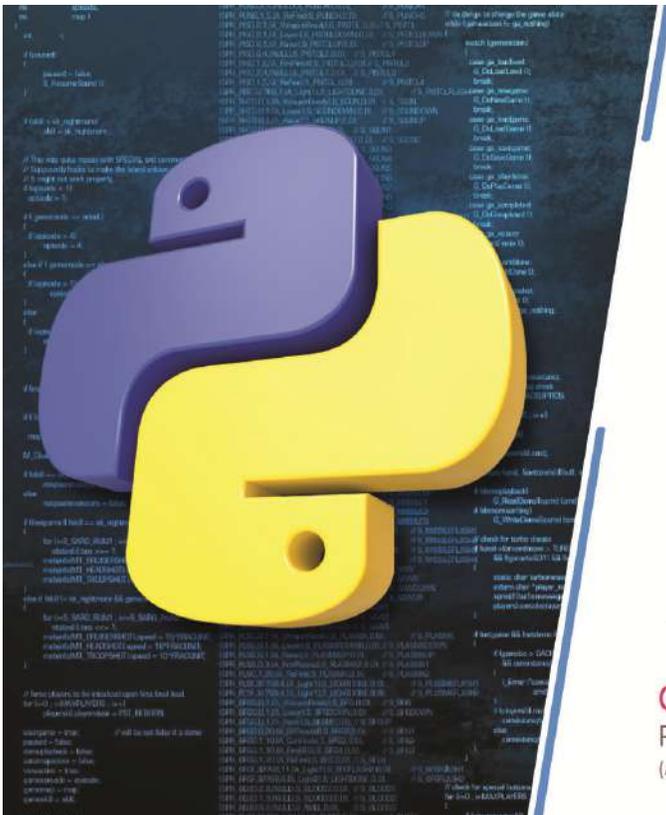

for

S4 EEE (2021-25 BATCH)

EVENT PROPOSAL FORM

1	Event type and Name	Value added program on " Fundamentals of Python"
2	Date and time	14 th to 18 th March 20213 , 9:30 am-4:00 pm
3	Participants/audience	S4 EEE students
4	Venue	Offline mode ,Software Lab
5	Objectives	<ol style="list-style-type: none">1. To understand the students how to build algorithm for solving different problems.2. To understand the students how to rectify errors in python programming.
6	Expected outcomes	<ol style="list-style-type: none">1. Students able to understand the basic concepts and iterating operations about PYTHON2. Students able to understand and analyze the arithmetic and logic programming operations about the PYTHON.3. Understanding the Data Types and language fundamentals of PYTHON4. Students able to analyze the functions and file actions in PYTHON5. Understanding the error corrections and advanced operations in Python with a socially relevant projects.
7	Connected POs/PSOs	PO1, PO2, PO3, PO4, PO5, PO6, PO8, PO9, PO10, PO11, PO12, CO1, CO2, CO3, CO4, CO5
8	Resource requirements	Software Lab
9	Any other Relevant Information	Resource Person: Mr. Muhammed Suhail, Robotics Engineer, Deepflow .Technologies Pvt LTD
10	Responsible Person	Proposal Prepared by, Ms. Tintu George T, Associate Professor , EEE, VJEC Mr Prabin James , Assistant Professor , EEE, VJEC Recommended by, Ms. Laly James, HOD EEE    13/03/2023  5/2 13/3

VALUE ADDED COURSE ON "FUNDAMENTALS OF PYTHON"

COURSE CODE : ADEE401

COURSE DURATION : 5 DAYS (30 hrs)

IN ASSOCIATION WITH

for S4 EEE

Venue : EEE Software Lab | On 14.03.2023 - 18.03.2023

Convener
Prof. Laly James
(Associate Professor,HOD, EEE)

Staff Co-ordinators
Ms. Tintu George,Assoc.P. EEE
Mr Prabin James,AP EEE

1. Introduction

This was a five day workshop on python programming organized by the Electrical & Electronics Department of Vimal Jyothi Engineering college from 14th to 18th March 2023 for all second year Electrical & Electronics students. To explore the power and simplicity of python, this workshop was very encouraging by covering all the python basics. The trainer Mr. Muhammad Suhail in his simple words gave us the mix of theory and practical knowledge of python programming

The session was inaugurated by Ms. Laly James, Head of The Department of Electrical and Electronics department, also motivated the students with her speech and explained that these kinds of workshops are beneficial for the upcoming placements and technical knowledge.

Day 1 : 14th March

Introduction to programming and python and the students were taught that python is a simple programming language compared to other programming languages. After that familiarized with 'Scratch', the world's largest coding community and a coding language with a simple visual interface that allows young people to create digital stories, games, and animation with some practical experience.

Day 2 : 15th March

On this day familiarized with Visual Studio Code, a source-code editor made by Microsoft and learned the basics of coding. Python Workshop

Day 3 : 16th March

Earned certificates of kaggle and a coding certificate. This day was quite interesting for completing the given task.

Day 4 : 17th March

Learned to prepare a notebook on google colab and prepared a python notebook by adding all the basic information about python that we have learned. So got a detailed idea about area covered and the notebook will be helpful for the future references also.

Day 5 : 18th March

Introduced with HackerRank, a website which will be helpful for preparing technical interviews. After that, learned some basics of machine learning. The five days of workshop got an end with the conclusion speech of Ms. Tintu George, Tutor, 2021-25 EEE batch and Mr. Jithin Nair and Mr. Ashwanth Shaji shared their experience on those five days. At the end of workshop students were happy knowing that they were now able to program Python.

2. Curriculum and lesson Plan

MODULE 1 Day 1	Environment Setup <ul style="list-style-type: none">• Python Installation• Execution Types• What is an interpreter?• Interpreters vs Compilers• Using the Python Interpreter• Interactive Mode• Running python files• Working with Python shell• Integrated Development Environments (IDEs)• Interactive Mode Programming• Script Mode Programming
MODULE 2 Day 2	Basic Operators in Python <ul style="list-style-type: none">• Types of Operators• Python Arithmetic Operators• Python Comparison Operators• Python Assignment Operators• Python Bitwise Operators• Python Logical Operators• Python Membership Operators (in, not in)• Python Identity Operators (is, is not)• Python Operators Precedence
MODULE 3 Day 3	Basic Concepts Data Types <ul style="list-style-type: none">• Variables• Assigning Values to Variables• Multiple Assignment• Python Numbers• Python Strings• Accessing Values in Strings• String Special Operators• String Formatting Operator• Triple Quotes• Built-in String Operations Python Lists <ul style="list-style-type: none">• Accessing Values in Lists• Updating Lists

	<ul style="list-style-type: none"> • Delete List Elements • Basic List Operations • Indexing, Slicing, and Matrixes • Built-in List Functions & Methods <p>Python Tuples</p> <ul style="list-style-type: none"> • Accessing Values in Tuples • Updating Tuples • Delete Tuple Elements • Basic Tuples Operations • Indexing, Slicing, and Matrixes • No Enclosing Delimiters • Built-in Tuple Functions <p>Python Dictionary</p> <ul style="list-style-type: none"> • Accessing Values in Dictionary • Updating Dictionary • Delete Dictionary Elements • Properties of Dictionary Keys • Built-in Dictionary Functions & Methods
<p>MODULE 4 Day 4</p>	<p>Loops and Decision Making</p> <ul style="list-style-type: none"> • if statements • ..else statements • nested if statements • while loop • for loop • nested loops • Loop Control Statements <ul style="list-style-type: none"> ◦ break statement ◦ continue statement ◦ pass statement <p>Functions</p> <ul style="list-style-type: none"> • Defining a Function • Syntax • Calling a Function • Pass by reference vs value • Function Arguments • Required arguments • Keyword arguments • Default arguments • Variable-length arguments • The return Statement • Scope of Variables

MODULE 5

Day 4

Python Modules and Packages

- Framework vs Packages
- Folium Introduction
- Why are modules used?
- Creating modules
- The import Statement
- The from...import Statement
- The from...import * Statement
- Locating Modules
- The PYTHONPATH Variable
- Namespaces and Scoping
- The dir() Function
- The globals() and locals() Functions
- The reload() Function
- Packages in Python
- Constructing user defined packages
- Importing user defined packages

Basic OOPs Concept

Creating class in Python

Private Identifier

Constructor

Inheritance

Polymorphism

Decorator, Iterator and Generator

Anonymous Function

- Lambda
- Map
- Filter
- Reduce

File Manipulation

- Opening Text File
- Working with a File on Python
- The open function
- File modes
- The file object attributes
- close() method
- write() method
- read() method
- Files: Input
- Files: Output
- Reading files
- Renaming & deleting files
- Writing into a file

	<ul style="list-style-type: none"> • remove() method
<p>MODULE 6 Day 5</p>	<p>Errors and Exception Handling</p> <ul style="list-style-type: none"> • Standard exceptions • Assertions in Python • The assert Statement • What is Exception? • Handling an exception • Syntax • The except Clause with No Exceptions • The except Clause with Multiple Exceptions • The try-finally Clause • Argument of an Exception • Regular Expression <p>Advanced Concept – Overviews</p> <ul style="list-style-type: none"> • Basics of Pandas and Numpy • How to use Anaconda • Overview of Machine Learning • Overview of Django

COURSE OUTCOMES

1. Students able to understand the basic concepts and iterating operations about PYTHON
2. Students able to understand and analyze the arithmetic and logic programming operations about the PYTHON.
3. Understanding the Data Types and language fundamentals of PYTHON
4. Students able to analyze the functions and file actions in PYTHON
5. Understanding the error corrections and advanced operations in Python with a socially relevant projects.

CO PO MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	M				H				H	M		H
CO2	H	H	M	M	H				H	M		H
CO3	H	M			H				H	M		H
CO4	H	H	H	H	H				H	M	H	H
CO5					H	H		H	H	M		H

3. Feedback from students

Able to understand the basic concepts and iterating operations about PYTHON

 Copy

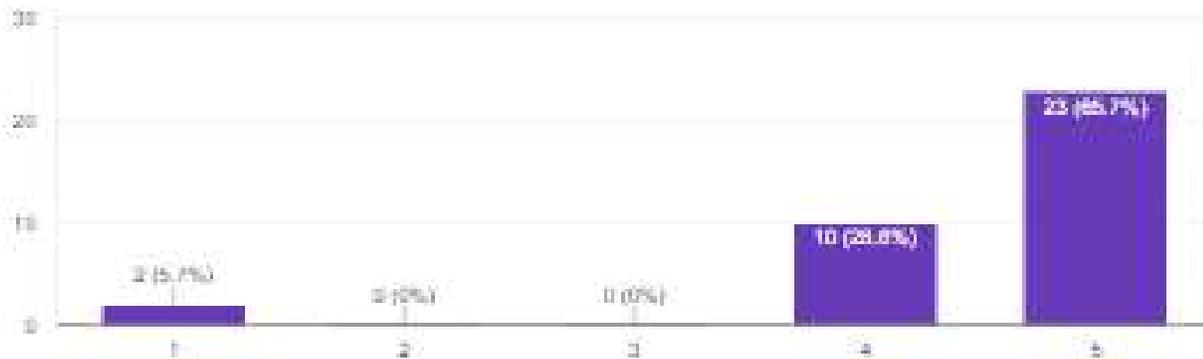

35 responses

Able to understand and analyze the arithmetic and logic programming operations about the PYTHON.

 Copy

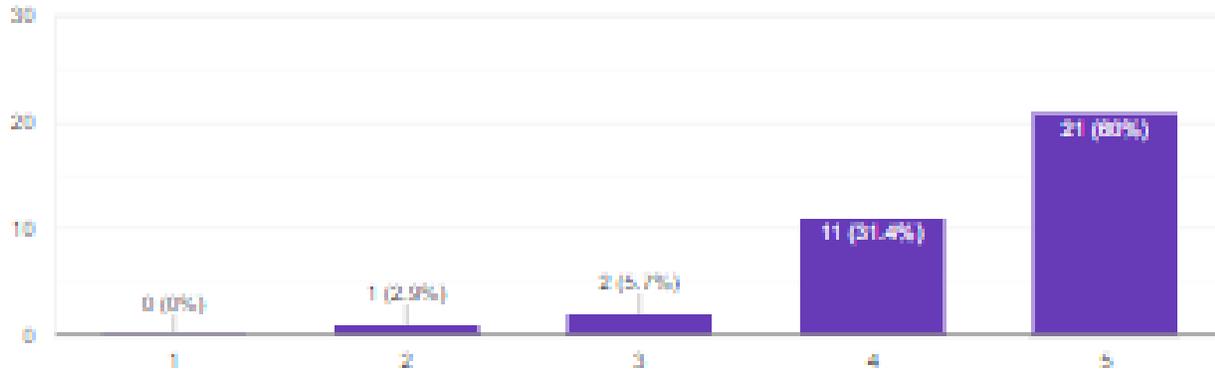

23 responses

Able to understand the Data Types and language fundamentals of PYTHON

 Copy

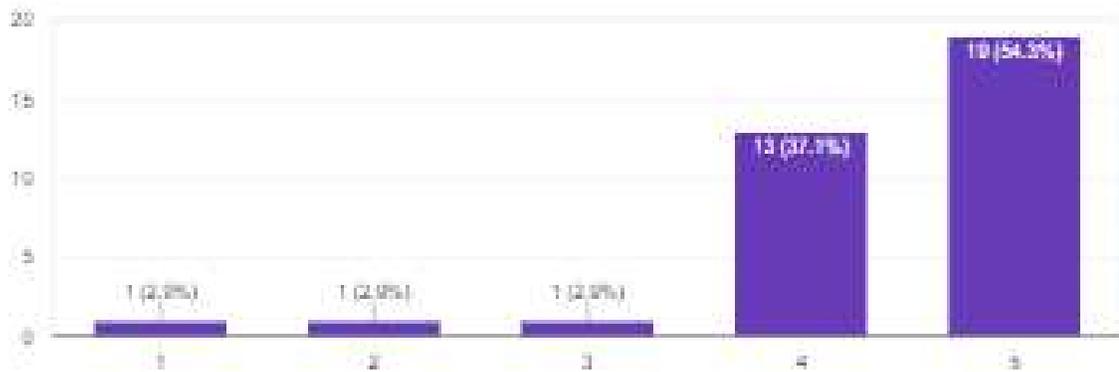

35 responses

Able to analyze the functions and file actions in PYTHON

 Copy

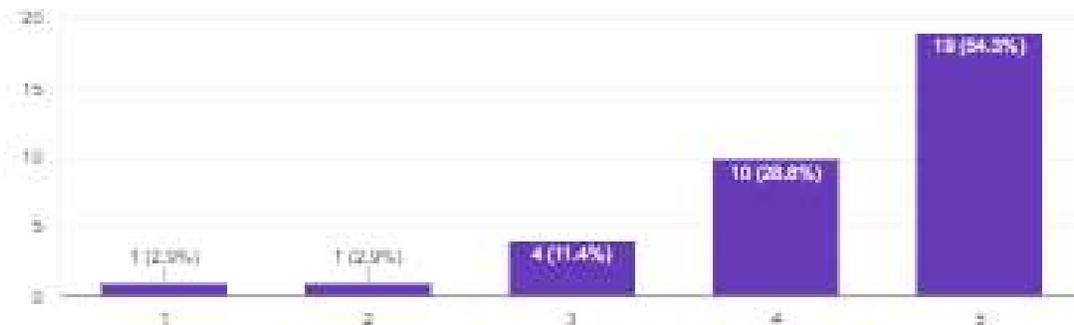

35 responses

Able to understand error corrections and advanced operations in Python with socially relevant projects.

Mr. Sajith Variyar V.V
AP, CEN, Amrita Vishwa Vidyapeetham, Coimbatore

Introduction

This add-on course was conducted for Sixth Semester Artificial Intelligence and Data Science students, to provide the core fundamentals behind the field of Deep Learning. It introduces major deep learning algorithms, the problem settings, and their applications to solve real world problems. This course covers basics and hands on approach to neural networks, understanding how CNN and RNN works with common examples.

The convenor of this course was Dr.Manoj V. Thomas, Professor, ADS and the course was organized by Ms.Ancy K Sunny, Assistant Professor, ADS and Ms. Thriphi P Balakrishnan, Assistant Professor, ADS and the sessions were handled by Dr. Premjith B and Mr. Sajith Variyar V.V, Assistant Professors, Center for Computational Engineering and Networking, Amrita Vishwa Vidyapeetham, Coimbatore. All the students (32 No.s) of S6 ADS participated in the course.

This report provides an overview of the course including syllabus, course activities, outcomes and assessment tools used.

Day 1 (29/03/2023)

The first day of the course was handled by Dr.Premjith B, with an introduction about machine learning and topics based backward propagation and Encoder-Decoder Model, Neural Language Model (NLM), Recurrent Neural Network (RNN), and transformer networks.

In second session, basic code and function in neural network and convolutional network was introduced to the students and handson session was provided for backward propagation and Encoder-Decoder Model, Neural Language Model (NLM), Recurrent Neural Network (RNN), and transformer networks

Day 2 (30/03/2023)

On the second day, Mr. Sajith Variyar handled a session on CNN networks, medical image processing techniques such as MRI, and Unet for medical image segmentation. The session was aimed at providing insights into the fields of medical imaging and how it is being transformed by deep learning techniques. He explained how CNNs work and how they are used for tasks such as image classification, object detection, and segmentation. He also discussed various types of CNN architectures and its implementation.

The second part of the session focused on medical image processing techniques, particularly Magnetic Resonance Imaging (MRI). Mr. Sajith Variyar explained the basic principles of MRI and how it is used to create images of internal organs and tissues. He also discussed common MRI image artifacts and how to address them.

The final part of the session covered Unet, a type of CNN architecture that is commonly used for medical image segmentation. Mr. Sajith Variyar explained how Unet works and how it can be trained on medical image datasets to segment regions of interest. He also discussed some of the challenges associated with medical image segmentation, such as class imbalance and limited training data. He also demonstrated how to use UNet for the medical image segmentation using the Python programming language.

Day 3 (31/03/2023)

On third day, the first session was on the Encoder-Decoder Model and Attention Mechanism, which are widely used in NLP tasks such as machine translation, text summarization, and image captioning. Mr. Premjith B explained the basics of these models and their working principles, using examples and case studies to illustrate their applications.

The second session was on Neural Language Models (NLM), which are used to predict the probability distribution of the next word in a sequence of words. Mr. Premjith B explained the different types of NLMs, such as feedforward neural networks, RNNs, and transformers, and their strengths and limitations. He also discussed the training and evaluation of NLMs, using examples and case studies to illustrate their applications.

The third session was on Recurrent Neural Network (RNN), which is a type of neural network that can process sequential data. Mr. Premjith B explained the working principles of RNNs, the challenges associated with training them, and their applications in NLP and other fields. He also discussed the different types of RNNs, such as simple RNN, LSTM, and GRU, and their strengths and limitations.

The final session was on transformer networks, which are a type of neural network that can process sequential data in parallel. Mr. Premjith B explained the working principles of transformer networks, their advantages over RNNs, and their applications in NLP and other fields. He also discussed the different types of transformer networks, such as BERT and GPT, and their strengths and limitations.

Day 4 (01/04/2023)

On fourth day, students were assigned with two projects :

1. Implement deep learning models for sentiment analysis using Recurrent Neural Network, Long Short Term Memory Networks, and Gated Recurrent Unit.
2. Build simple CNN network which can classify the leaves given in above dataset. The Dataset given in above link contains 38 different diseases (38 class). Train the CNN model to classify different diseases.

This covered the fifth course outcome(CO5).

Day 5 (02/04/2023)

On fifth day, assessment was done. A quiz was conducted covering all the topics introduced in the session which focussed on course outcomes, CO1 to CO4.

A project presentation was done by students, in which they explained their work. Also, a feedback was taken from students which covered all the POs and PSOs.

Curriculum

Module I

Introduction to Deep Learning - Introduction to Deep Learning-Difference between Machine Learning and Deep Learning

Module II

Deep Neural Network (DNN) - Perceptron - Activation function - Parameters of a neural network - Loss functions - Optimizers- Image classification using DNN (Including hands-on session)

Module III

Deep learning for Computer Vision - Convolutional Neural Network - Convolutional Neural Network (CNN) - Components of a CNN - Transfer learning with CNN- CNN applications for biomedical image data (Including hands-on session)

Module IV

Deep Learning for Natural Language Processing - Sequential data - How to process sequential data? - Recurrent Neural Network (RNN)- Long Short - Term Memory (LSTM) Networks- Text classification using RNN and LSTM (Including hands-on session) - Encoder - Decoder Architecture for Machine Translation

SYLLABUS

Deep Learning - A real-world approach

Course Description

This course aims to present the core fundamentals behind the field of Deep Learning. It introduces major deep learning algorithms, the problem settings, and their applications to solve real world problems. This course covers basics and hands on approach to neural networks, understanding how CNN and RNN works with common examples.

Course Objective

- Introduces the fundamental concepts of Deep Learning and its applications by Providing an overview of Deep Learning techniques like Artificial Neural Networks, Convolutional Neural Networks, and Recurrent Neural Networks.
- Provides Hands-on experience with popular Deep Learning frameworks.
- Understanding the challenges and limitations of Deep Learning and how to overcome them.
- Developing problem-solving skills and the ability to design and implement Deep Learning solutions to real-world problems.

Course Outcomes (CO)

At the end of the course students will be able

1. To differentiate between various machine learning and deep learning algorithms.
2. To apply DNN for image classification.
3. To apply CNN in Biomedical field.
4. To build RNN and LSTM models for different NLP applications.

5. To develop a solution for a real-world problem that demonstrates a thorough understanding of deep learning principles and concepts, achieved through effective teamwork.

CO-PO/PSO Mapping

COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO1	PSO2
CO1	3	3	3	3	1								3	3
CO2	3	3	3	3	2								3	3
CO3	3	3	3	3	2								3	3
CO4	3	3	3	3	2								3	3
CO5	3	3	3	3	3	3	3	3	3	3	3	3	3	3

Syllabus

Unit	Details	Hours
1	Introduction to Deep Learning - Introduction to Deep Learning - Difference between Machine Learning and Deep Learning	4
2	Deep Neural Network (DNN) - Perceptron - Activation function - Parameters of a neural network - Loss functions - Optimizers- Image classification using DNN (Including hands-on session)	6
3	Deep learning for Computer Vision - Convolutional Neural Network - Convolutional Neural Network (CNN) - Components of a CNN - Transfer learning with CNN- CNN applications for biomedical image data (Including hands-on session)	7
4	Deep Learning for Natural Language Processing - Sequential data - How to process sequential data? - Recurrent Neural Network (RNN)- Long Short - Term Memory (LSTM) Networks- Text classification using RNN and LSTM(Including hands-on session) - Encoder - Decoder Architecture for Machine Translation	7
Course Project and Evaluation		6

31/03/2023	<p>Deep Learning for Natural Language Processing</p> <ul style="list-style-type: none"> - Sequential data - How to process sequential data? - Recurrent Neural Network (RNN) - Long Short - Term Memory (LSTM) Networks - Text classification using RNN and LSTM (Including hands-on session) - Encoder - Decoder Architecture for Machine Translation
01/04/2023	Project based on NLP and image processing
02/04/2023	Presentation and Feedback

Assessment tools used

- For the assessment of course outcomes (CO1 to CO4), a test was conducted for the students based on the topics which they learned during the session.
- For the assessment of course outcome CO5, two projects were assigned to students. Students implemented the projects and was evaluated by project presentation of students using following rubrics:
- Assessment of POs/PSOs, was done by collecting feedback from students.

Event proposal form

1	Event type and name	ADD ON Course ADEC801 Conceptual study of Data Science
2	Date and time	March 1, 2023 to March 5, 2023
3	Participants/ audience	Semester 8 ECE Students
4	Venue	Research lab, ECE
5	Objectives	To apply quantitative modeling and data analysis techniques to the solution of real-world business problems To effectively present results using data visualization techniques.
6	Expected outcomes	Students will be able to 1. Apply quantitative modeling and data analysis techniques to the solution of real-world business problems 2. Effectively present results using data visualization techniques.
7	Connected PO/PSO	PO- 1,5,12, PSO- 1
8	Resource requirements	PC/Laptops
9	Any other relevant information	Resource person: Mr. Sarin C R Chief Resource Person AltGrades Kochi. Remuneration: 27000/-
10	Responsible persons	<u>Staff coordinators:</u> Dr Jayesh George M, Ms. Shimna P K, Ms. Sudharshana Vijayan <u>Convenor:</u> Dr Anto Sahaya Dhas D Professor & HOD, Dept. of CSE

ADEC801 Conceptual study of Data Science

For Semester 8 ECE Students

Aim: Provide Insights About the Roles of a Data Scientists, Learn Techniques and Tools for Transformation of Data Learn and Data Visualization and Optimization

Learning Objectives

Students who have completed the Add on Course in Data Science Program will be able to:

Apply quantitative modeling and data analysis techniques to the solution of real-world business problems and effectively present results using data visualization techniques.

Curriculum Prepared by

Dr. Jayesh George M

Ms. Shimna P K

Ms. Sudharshana Vijayan

Day I - Python Fundamentals

9.00 - 11.00	Career Prospectus in Data Science Python Basics - IO Statements
11.00 - 01.00	Lists, Strings, Tuples, Sets and Dictionary
2.00 - 4.00	Numpy and Statistics Github and Digital Resume

Day II - AI with Python

9.00 - 11.00	Pandas
11.00 - 01.00	Data Analytics
2.00 - 4.00	Plotting with Python

Day III - Advanced Data Science and Projects

9.00 - 11.00	AI with Python and Regression
11.00 - 01.00	Clustering and Classification
2.00 - 4.00	Hands on Project

Day IV- Advanced Data Science and Projects

9.00 - 11.00	Introduction to SQL
11.00 - 01.00	How to face interview questions for Data Science - SQL Case study
2.00 - 4.00	Hands on Project

Day V - Advanced Data Science and Projects

9.00 - 11.00	Power BI
11.00 - 01.00	Hands on Project
2.00 - 4.00	Hands on Project

Budget

30,000 INR +GST (18%) = 35400/-

Report on ADD ON Course

ADEC801 CONCEPTUAL STUDY ON DATA SCIENCE

A five-day workshop on Conceptual Study on Data Science was conducted for S8 ECE students from 1st March to 5th March of 2023. It was conducted at Advanced Communication Lab, ECE Department.

The session was handled by Dr. Sarin C R (Academic Manager and SME (Data Science)). About 61 students attended this session. Major topics discussed were Basics of Python, SQL and Microsoft Power BI. Also several websites were introduced which included github, datalemur, LinkedIn, etc., for future job opportunities. He encouraged us to attend a Cognitive AI test which is related to the topics that he had covered to attain a certificate that can help us upgrade our profile.

The session was very useful and informative. A good response was put forward by the students and they are eager to know more about this and wanted more sessions like this in future.

VIMAL JYOTHI ENGINEERING COLLEGE CHEMPERI
DEPARTMENT OF ELECTRONICS &
INSTRUMENTATION ENGINEERING
ADD-ON COURSE ON MACHINE VISION & ARTIFICIAL
INTELLIGENCE IN ROBOTICS

Duration: 28.02.2023 to 04.03.2023

Department of electronics & instrumentation successfully conducted an Add-on course on Machine Vision and Artificial Intelligence in Robotics in In association with Srishti Robotics Technologies Pvt Ltd, from 28th February 2023 to 4th March 2023.. The program was organized for Final Year Applied Electronics and Instrumentation Engineering Students.

The Program was Inaugurated by Dr. G Glan Devadhas, Vice Principal, HOD EIE on 28th February 2022. Final year students and all faculties of the department were present in the inauguration function. Mr. Shinu M M, AP EIE delivered the welcome address and Ms. Jinsa Mathew, AP EIE, delivered the vote of thanks.

Vimal Jyothi Engineering College, Kerala, Signed MoU with Srishti Robotics Technologies Pvt Ltd. for development of Engineering Students.

The Program was scheduled for 5 days, with the following lesson plan.

28.2.2023

DAY 1 : Python programming Fundamentals

- Variables, data types, conditions.
- Functional programming
- Python Exceptions Handling
- Graphical user interfaces.

01.03.2023

DAY 2 : Getting started with Machine Vision

- Machine Vision Introduction
- OpenCV overview
- Different color spaces and conversion
- Different morphological processing operations

02.03.2023

DAY 3 : Object Detection and Tracking

- Movement Detection
- Detecting coloured objects
- Contours
- Track and count coloured objects

03.03.2023

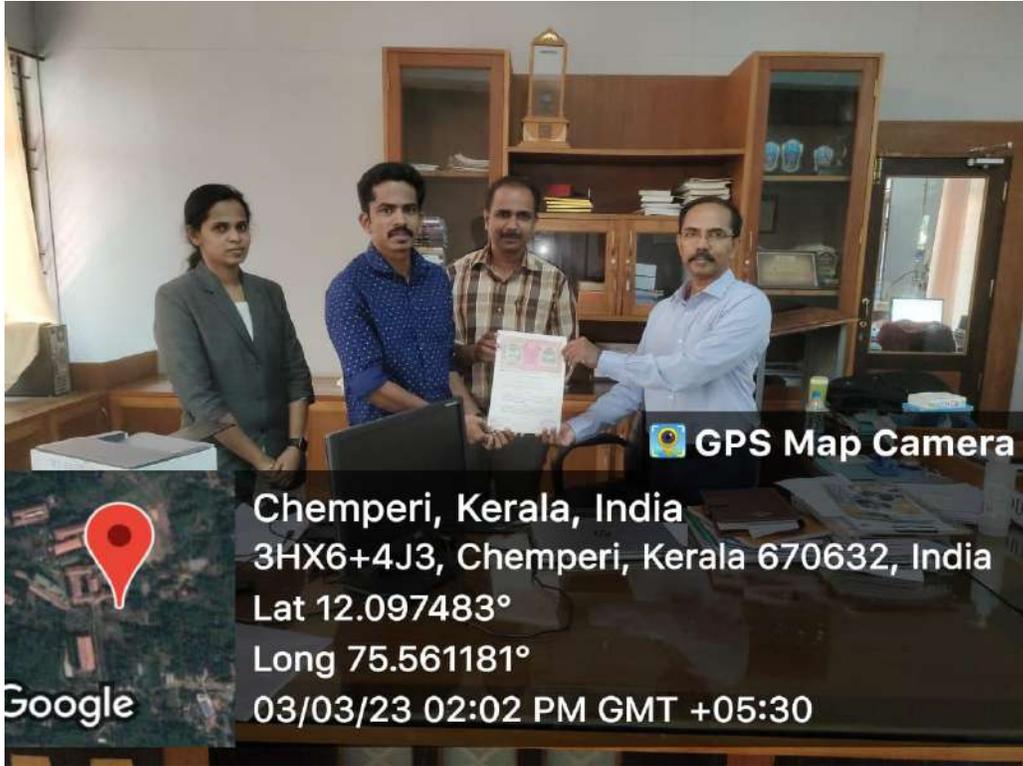

DAY 4 : Artificial Intelligence

- Fundamentals of AI
- Advanced AI libraries for Vision
- Version control and source code management

04.03.2023

DAY 5 : Capstone Projects

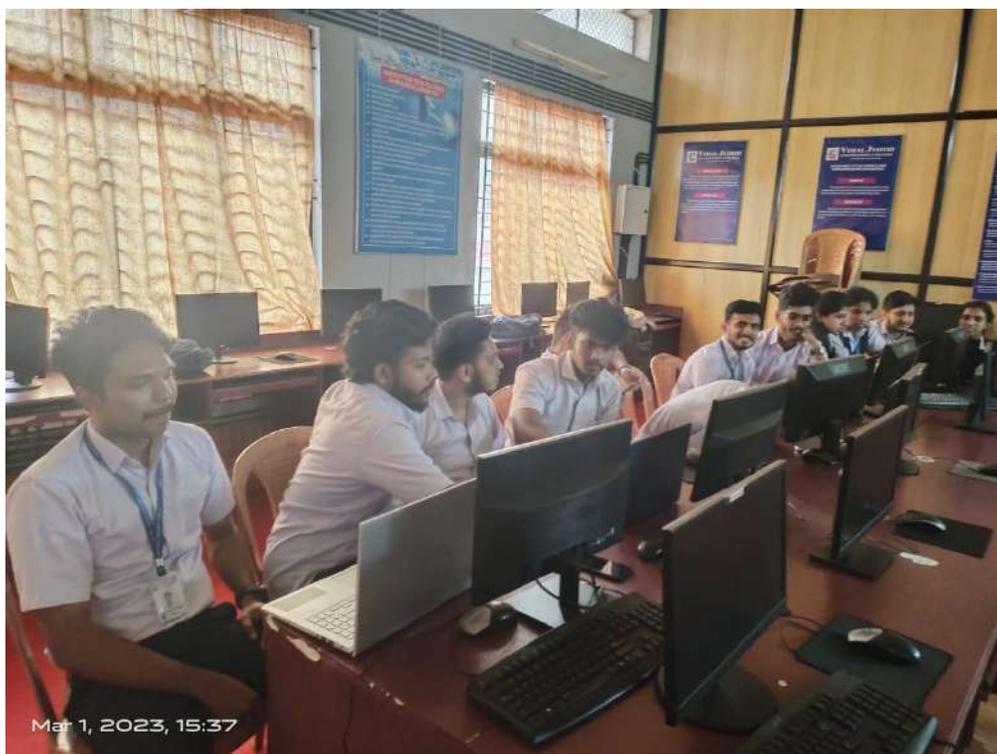

Photographs

Mar 1, 2023, 15:40

Model Certificate

Certificate of Completion

This is to certify that Mr/Ms **ADWAITH PRADEEP** has successfully completed the **MACHINE VISION AND ARTIFICIAL INTELLIGENCE IN ROBOTICS** training program conducted by Srishti Robotics Technologies Pvt. Ltd. From **28-02-2023** to **04-03-2023**

Key Modules Covered are,

- ☑ Python Fundamentals
- ☑ Image Processing
- ☑ Machine Vision with OpenCV and Python
- ☑ Advanced artificial intelligence libraries

Jithin C V
Senior Curriculum Designer

SRT-EKM-AC-23/001

Curriculum

Module 1: Python programming Fundamentals

- Variables, data types, conditions.
- Functional programming
- Python Exceptions Handling
- Graphical user interfaces.

Module 2: Getting started with Machine Vision

- Machine Vision Introduction
- OpenCV overview
- Different color spaces and conversion
- Different morphological processing operations

Module 3 : Object Detection and Tracking

- Movement Detection
- Detecting coloured objects
- Contours
- Track and count coloured objects

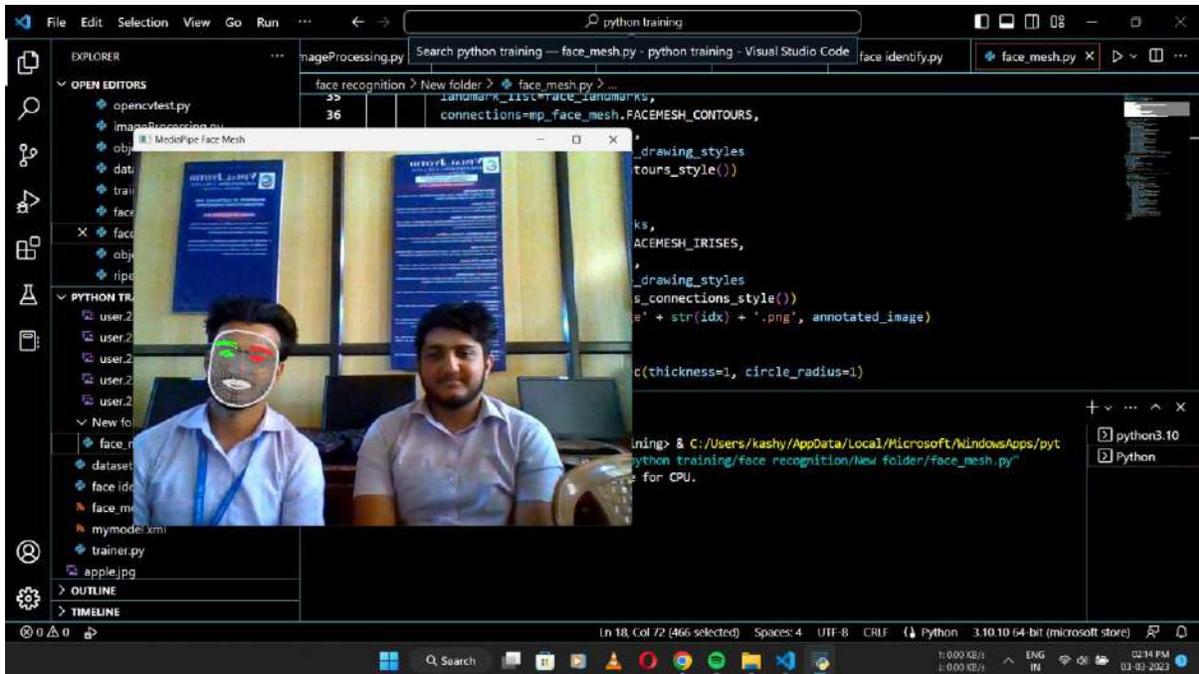

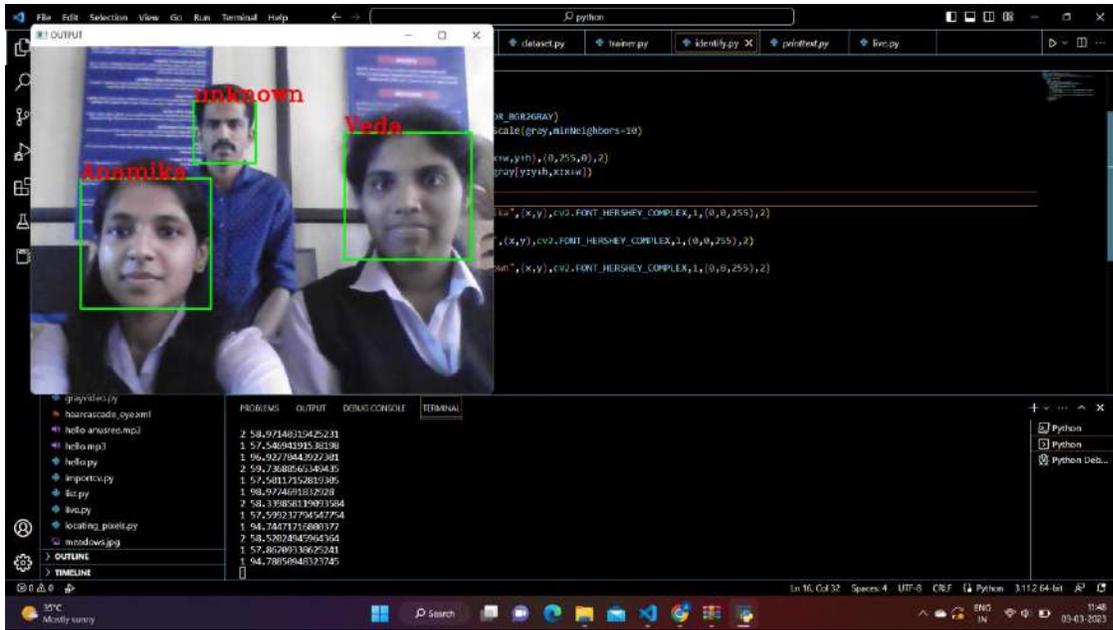

Module 4 : Artificial Intelligence

- Fundamentals of AI
- Advanced AI libraries for Vision
- Version control and source code management

Module 5 : Capstone Projects

Assessment procedures

1. On the fifth day of the Add-on course, Group Vice Projects are created and evaluated. The projects lists are
 - a. Face detection using python
 - b. Object detection using python
 - c. Video capturing using python
 - d. Pattern creation

Workshop on amplifier circuits

The Electronics and communication department has conducted a “Workshop on amplifier circuits” in association with IETE Vimal Jyothi Chapter on 14-05-2020. The speaker Prof. Dinesh Babu, GEC Kannur. He explained about basic circuits of amplifier in Electronics. He has clarified various myths regarding the topics. Afterwards he briefed the session regarding amplifier circuits. The participants (both faculty and students) have opined that the session is highly beneficial.

REPORT

WORKSHOP on C

The Department of Electronics and Communication Engineering, VJEC, Chemperi conducted 2 days workshop on C++ on 13th & 14th April 2019.

INITIATIVE

Discussed with principal about the session and he approved the proposal. The poster of workshop is pasted in department notice board.

The inaugural session was started at 10.00am, 1 April 2019, and the session started at 10.30am

OVERVIEW

The main objective of the workshop is to make aware about C programming, and JAVA programming

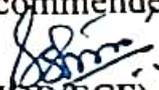

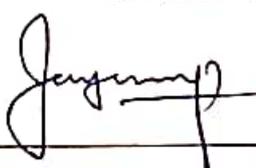

The session was conducted by Ms Namitha, Asst professor, LBS College Of Engineering, Kasaragod

Post Event Impact Analysis Report

1	Event type and name	Event Name: Workshop On C++
		Type: Days Workshop
		Topic: workshop on C++
	Date and time	13th, & 14th of April 2019
3	Participants/ audience	S6 ECE STUDENTS
4	Venue	Research Lab, ECE Department, VJEC
5	Outcomes of the event	1. Introduction to C Programming 2. Introduction to JAVA Programming
6	Attainment level of outcomes	Attainment level: 3
7	List of feedback from the	Attached in separate sheets.
8	Connected P Os/COs	PO-1,3,4,5,9
9	Any other relevant information	Resource Persons from LBS Engineering College
10	Responsible persons	Report prepared by Jerrin Yomas (AP/ECE)
		Recommended by  Roshini T V (HOD/ECE) 

VIMAL JYOTHI ENGINEERING COLLEGE, CHEMPERI

DEPARTMENT OF ELECTRONICS AND COMMUNICATION

Presents
WEBINAR ON

"BUILD YOUR FIRST APP WITH JAVA, KOTLIN"

In association with IETE VJEC CHAPTER
For SS, SS, S7 students

OCT 17 2020

11:30am - 1:30pm

SATURDAY

Google meet code

gmm-fofw-edf

RESOURCE PERSON

Mr. Shijin K V

Junior Android Developer

ALISONS Informatics Pvt Ltd

FACULTY COORDINATORS

Manoj K G, APECE

Binil Kumar K, AP ECE

Bindu Sebastian, APECE

STUDENT COORDINATOR

Sanjay Prakash, S7 ECE

VISION OF THE DEPARTMENT

To be a pacesetter in the field of Electronics and Communication Engineering.

MISSION OF THE DEPARTMENT

M1. To provide quality education for the students in the field of Electronics and Communication Engineering.

M2. To educate students about professional and ethical responsibilities and train them to build life skills for their career development.

VIMAL JYOTHI ENGINEERING COLLEGE

JYOTHI NAGAR, CHEMPERI - 670632, KANNUR D T, KERALA
An ISO 9001 2008 Certified Institution

Event Proposal Form

1	Event Type and Name	Event Name : Training Program Type : Webinar Topic : Build Your First APP with Java and KOTLIN
2	Date and time	17-10-2020 , 11.30AM -1:30 PM
3	Participants/ audience	B.Tech ECE S3, S5, S7 Semester students.
4	Venue/Platform	Google Meet
5	Objectives	To familiarize basic concept of android app development
6.	Expected outcomes	1. Understand the basic concept of android Programming 2. Familiarized the different tools available for APP development
7	Connected PEOs/POs/COs	PO-1,2,3,5,9,12,PSO1
8	Resource Requirement/ Association	Device with Google meet application and internet connectivity. In Association with IETE VJEC Chapter
9	Any other relevant Information	The Session will be handled by Mr. Shijin K V, Junior Android Developer, ALISONS Informatics Pvt Ltd.
10	Responsible persons	Proposal prepared by Manoj K C Binil Kumar K Bindhu Sebastian Recommended by Dr. Anto Sahaya Dhas HOD ECE

REPORT

Webinar on Build Your First APP with Java and KOTLIN

A Webinar on Build Your First APP with Java and KOTLIN is arranged by Department of Electronics and Communication Engineering, Vimal Jyothi Engineering College, Chemperi, Kannur on 17th October 2020 at 11.30 AM to 1.30 PM. The resource person was Mr. Shijin K V, Junior Android Developer, ALISONS Informatics Pvt Ltd. S7,S5,S3 students from EC department attended the webinar .Total 71 students from the department attended the webinar.The webinar was an excellent opportunity for the students to familiar with KOTLIN platform which is used for android development. The resource person started from the very basics with appropriate demos such that the participants clearly obtained the role of KOTLIN & JAVA in android developement.An active doubt clearing section was conducted after the webinar. Vote of thanks is given by Mr.Manoj KC, Associate Professor, ECE Department at the end. The program was wind up by 1.30 PM.

Number of active participants in the webinar: 77.

Feedback	E-mail	Name	Semester	How informative did you find the workshop	Overall how satisfied were you with it	Would you say the speaker	Please rate your overall experience

ADD ON Course in Conceptual study of Data Science

For Semester 8 ECE Students

Aim: Provide Insights About the Roles of a Data Scientists, Learn Techniques and Tools for Transformation of Data Learn and Data Visualization and Optimization

Learning Objectives

Students who have completed the Add on Course in Data Science Program will be able to:

Apply quantitative modeling and data analysis techniques to the solution of real-world business problems and effectively present results using data visualization techniques.

Curriculum Prepared by

Dr. Jayesh George M

Ms. Shimna P K

Ms. Sudharshana Vijayan

Day I - Python Fundamentals

9.00 - 11.00	Career Prospectus in Data Science Python Basics - IO Statements
11.00 - 01.00	Lists, Strings, Tuples, Sets and Dictionary
2.00 - 4.00	Numpy and Statistics Github and Digital Resume

Day II - AI with Python

9.00 - 11.00	Pandas
11.00 - 01.00	Data Analytics
2.00 - 4.00	Plotting with Python

Day III - Advanced Data Science and Projects

9.00 - 11.00	AI with Python and Regression
11.00 - 01.00	Clustering and Classification
2.00 - 4.00	Hands on Project

Report on ADD ON Course

ADEC801 CONCEPTUAL STUDY ON DATA SCIENCE

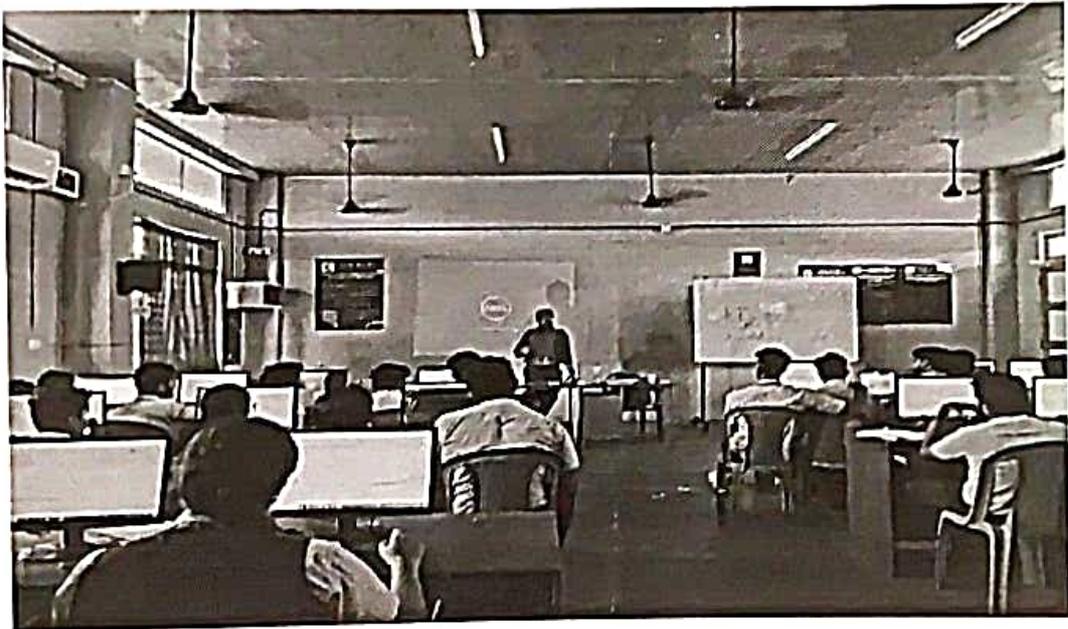

A five-day workshop on Conceptual Study on Data Science was conducted for S8 ECE students from 1st March to 5th March of 2023. It was conducted at Advanced Communication Lab, ECE Department.

The session was handled by Dr. Sarin C R (Academic Manager and SME (Data Science)). About 61 students attended this session. Major topics discussed were Basics of Python, SQL and Microsoft Power BI. Also several websites were introduced which included github, datalemur, LinkedIn, etc., for future job opportunities. He encouraged us to attend a Cognitive AI test which is related to the topics that he had covered to attain a certificate that can help us upgrade our profile.

The session was very useful and informative. A good response was put forward by the students and they are eager to know more about this and wanted more sessions like this in future.

ECE Dept.

Respected Sir,

Request for Add-on Course Remuneration - Req.

Electronics and Communication Engg. department has conducted an Add-on course 'conceptual study data science' on 01/3/23 to 05/03/23 for 58 ECE students.

The remuneration of the course is 27000/-. So I kindly request you to credit the amount to the following account for the same.

Thanking you.

Canara Bank.

VIMAL JYOTHI ENGINEERING COLLEGE

JYOTHI NAGAR, CHEMPERI - 670632, KANNUR D.T. KERALA
An ISO 9001: 2008 Certified Institution

1	Event type and Name	Add on course on "Fundamentals in python programming"
2	Date and time	10/03/2023 to 14/03/2023, 9.00AM to 4PM
3	Participants/audience	S4 ECE students (2021-25 Batch).
4	Venue	ECE department -Advanced communication engineering lab.
5	Objectives	To understand the fundamentals of Python programming language.
6	Expected outcomes	Students will understand Python fundamentals and they will be able to develop python programs for various applications.
7	Connected POs/PSOs	PO1, PO3, PO5, PO12
8	Resource requirements	Course fee - Rs.30000 + 18% GST (Approved by the management)
9	Any other Relevant Information	Resource Person/team - Quest Innovative solutions Kannur. Accommodation is required for the resource team (2 members)
10	Responsible Persons	Mr. Vinod J Thomas ,ASP, ECE Mr. Manoj K C ,ASP, ECE Ms. Jerrin Yomas , ASP, ECE
11	Department	Electronics & Communication Engineering Department, VJEC.

ADD-ON COURSE REPORT

TITLE: FUNDAMENTALS IN PYTHON PROGRAMMING

CODE – ADEC401

The Electronics & Communication Engineering department of Vimal Jyothi Engineering College conducted an add-on course for fourth-semester ECE students aimed at skill development. The course was held from 10th March to 14th March 2023 and aimed to equip students with practical knowledge and experience in the field of Python programming.

The course, which covered fundamental concepts in Python programming and their practical implementation was led by Mr. Akesh and Mr. Jayasurya of Quest Innovative Solutions and was attended by 54 fourth-semester ECE students from Vimal Jyothi Engineering College.

On the first day of the add-on course, a range of topics were covered, primarily focused on the fundamentals of Python programming. The day began with an introduction to Python and a discussion of its advantages and disadvantages compared to other programming languages such as R. The session also covered the popular Integrated Development Environments (IDEs) for Python and provided guidance on installing Python and Visual Studio Code. Students were then introduced to the concept of variables, including how to declare them and the automatic assignment of data types in Python. The session also covered collections of variables and basic data structures such as strings, including strings as arrays, string length, checking if a string is in, and string slicing. Additionally, operators, including arithmetic and logical operators and Boolean operators, were introduced. Finally, the session concluded with an overview of lists, tuples, sets, and dictionaries, providing students with a solid foundation in Python programming fundamentals.

On the second day of the add-on course, the session focused on additional fundamentals of Python programming. The day began with an introduction to looping statements, including a discussion of what loops are and an overview of for-each loop and while loops. The session then moved on to conditional statements, including an explanation of what they are and a detailed look at the different types of conditional statements. Next, the session covered user-defined functions and lambda functions, including an explanation of what each is and how to use them. The day concluded with a session on file handling in Python, providing students with a foundation in this important aspect of Python programming.

On the third day of the Python workshop, participants were introduced to the basics of data science and data analysis using the Python programming language. The day started with

an overview of the Anaconda environment and how to install Jupiter Notebook for running Python code. The primary focus of the day was on the panda's library, which is a powerful data manipulation and analysis tool. Participants learned how to read and process data files using pandas, and how to perform various data cleaning tasks such as identifying and removing missing values and duplicates. They were also introduced to data exploration techniques using pandas, such as selecting, grouping, and sorting data.

Additionally, the workshop covered the basics of working with NumPy arrays, which are an essential component of data analysis in Python. Participants learned how to create and manipulate arrays, perform operations on them, and use them for data analysis tasks.

Finally, the day concluded with an introduction to Matplotlib, a powerful visualization tool for creating charts, graphs, and other visual representations of data. Participants learned how to use Matplotlib to create basic plots and charts to display their data in a meaningful way. Overall, the day provided participants with a solid foundation in data analysis using Python and its various libraries.

On the fourth and fifth days of the Python course, participants were introduced to the basics of application development using Python. They were taught how to use the Python language to write scripts and programs, and how to create basic applications using various Python libraries. During these days, participants learned about important programming concepts such as variables, data types, conditionals, loops, and functions. They were also introduced to object-oriented programming in Python and how to create classes, objects, and methods. In addition, participants were introduced to different Python libraries that are commonly used in application development, such as Flask, Django, and Tkinter. They learned how to use these libraries to create web applications, GUI-based applications, and other types of applications. The practical hands-on approach of the course allowed participants to apply what they learned by working on various projects and exercises. By the end of the course, participants had gained a solid understanding of Python programming fundamentals and application development, which provided a strong foundation for further exploration and development in this area.

At the end of the Python workshop, feedback was collected from the participants to assess their experience and understanding of the material covered. Additionally, an assessment test was conducted to evaluate their proficiency in the language. The feedback and assessment results were overwhelmingly positive, with participants expressing satisfaction with the workshop and their increased knowledge of Python. Certificates were provided to students who completed the assessment and provided feedback. Overall, the response and performance of the participants were deemed to be excellent, indicating the success of the workshop and the effectiveness of the instruction provided.
