## Title of the Activity: Covid Buster (UNNAT BHARAT ABHIYAN)

**Need of the Activity:** We use the procedure to test the body temperature of **the** students/ people as a screening test for COVID- 19. One method to measure a person's surface temperature is the use of "no-touch" or non-contact temperature assessment devices.

## Brief Description (Need/Impact/Action/Picture (if any)):

We developed a low cost IoT based device to measure the temperature and record the same in the cloud. This can be installed in the schools/ hospitals in the villages to avoid direct human intervention from the temperature screening process.
