New Batch of Alumni 2022 Pass out batch

Congratulations to Mr.Khamarudheen rafeeq (our alumnus 2015-19 batch) has published his poetry collection as "Aathma preethi"

Sachin P Jose
(2007-11 ECE)
Product Design Lead
Rebuy gmbh
Berlin

വർഷം:

ശിഥിലമായ നിന്നൊരൻ
 ആത്മാവിനെ
 പുണർന്നിന്നു നീ ഉണർത്തിയല്ലോ!
 നിൻ മൃദുസ്പർശത്താൽ
 ഇന്നെന്റെ ഉൾക്കാമ്പിൽ
 പുതുസ്പന്ദനം ചിറകടിച്ചു...
 എന്തെ എന്തെ നീ വൈകിവന്നു
 എന്റെ ജീവനെ
 തൊട്ടുണർത്താൻ....
 നിന്റെ ഓരോ ജലകണങ്ങൾ
 എന്നിൽ ആത്മബിന്ദുക്കളായ്...

Dhanya P (2016-2020 EEE)
 MTech Guidance and Navigation
 Control (Second year)
 College of Engineering, Trivadrum

Reshmi T (2007-11 ECE)
Staff Engineer
Lifesignals India Pvt Ltd

Congratulations ...

കോഴിക്കോട് നാഷണൽ ഇൻസ്റ്റിറ്റ്യൂട്ട് ഓഫ് ടെക്നോളജിയിൽനിന്ന് ഇലക്ട്രോണിക്സ് ആൻഡ് കമ്പ്യൂട്ടറുകളിൽ എൻജിനീയറിംഗിൽ ഡോക്ടറേറ്റ് നേടിയ ജോബിൻ പ്രമാൻസിസ്. ഇരിട്ടി ഉള്ളിക്കലിലെ കപ്ലാരുമലയിൽ പ്രമാൻസിസ്- വത്സമ്മ ദമ്പതികളുടെ മകനാണ്. ഭാര്യ: ഡോ. ശാലു വർഗീസ്.

വിമൽജ്യോതി എൻജിനീയറിംഗ് കോളേജിലെ പൂർവ്വ വിദ്യാർത്ഥിയും (2005-09 batch) ഇലക്ട്രോണിക്സ് ആൻഡ് കമ്പ്യൂട്ടറുകളിൽ എൻജിനീയറിംഗ് ഡിപ്ലോമയിലെ മുൻ അധ്യാപകനുമായിരുന്ന ജോബിൻ സാറിന് വിമൽജ്യോതി കുടുംബത്തിന്റെ അഭിനന്ദനങ്ങൾ....

Congratulations to our Dear Alumnus and former staff of VJEC Dr.Steffy Maria Joseph (ECE,2007-11- Batch) for successfully defended her Ph.D Thesis, titled "DESIGN AND DEVELOPMENT OF AN AUTOMATED SYSTEM FOR THE DETERMINATION OF GENE EXPRESSION RATIOS USING DNA MICROARRAY IMAGES", at National Institute of Technology, Calicut...

Congratulations ...

Congratulates

Mr. P.T SHIHAB
BTech CSE 2006-10 batch

On acquiring commercial pilot license after studies in
India and USA

ASTREK Innovations

Robin Kanattu Thomas (2014-2018 EEE)

Co-founder

Astrek Innovations

Since childhood, I was a curious . My grandfather was the one person who gave wings to my thoughts. He supported me in each step of my life. But one fine day, it happened, he met with an accident that changed the course of my life.

I was in college, which was indeed a huge step in my life. I had few of my friends with me who stayed by me through thick and thin. The idea of doing something innovative started after I joined college.

After the accident my grandfather was crippled and could not walk. After doing the operation in records, he still could not walk. Even the idea of using rehabilitation solutions to make him walk was difficult due to the unavailability of it. He needed help from the family to do even the basic things in life. As the cost of rehabilitation solutions were so high, I wanted to create something which was affordable to the common people. I discussed about the same with my friends who took a lot of interest on it. They supported me and that was the day I thought of establishing a startup.

I, along with my team, have come up and instigated a start-up that focusses on how assistive technology can be used to aid those individuals who are differently abled. We are currently in the research and development stage of inventing a lower limb exo-suit meant for paraplegic and wheelchair bound patients which would enable them to walk on their own. We strive and believe that we can make a better world for those in need.

My grandfather passed away after I started my work, but that gave me the determination to move forward. That one personal loss was my greatest strength. By then my team and I started developing assistive devices for daily living for specially-abled schools. Step by step we moved forward and established Astrek Innovations.

The company is working with the vision is to create a portfolio of advanced technology enabled devices in the assistive technologies sector, thus bridging the gap between the common man and quality healthcare.

Through its product, Astrek Innovations want to aid patients with walking disabilities in their therapies and to perform simple utilitarian tasks. The company is working to make the product available at lower Page 6 of 14 that it becomes affordable for the economically backward class.

I believe, the world's essential driver of advancement is technological development. In any case, it's insufficient for innovations to be concocted, they should be scaled and incorporated into the structure holding the system together. The best approach to help the spread of development all through society is the array of new innovations. I expect to change the world by helping people to make their life better. I trust this could drastically quicken the pace of advancement and sling the world to another dimension of transformative improvement.

Our startup was a success because of these heads that worked behind it Jithin Vidya Ajith (COO – Astrek Innovations). He handles the business end of the startup and plays the devil's advocate when required to anticipate risks in the journey. The other core members of the team are Alex M Sunny (CTO- Astrek Innovations) leads the development and is somewhat of a geek in hardware technology. Sidharth Sivadasan (Design) is the designer that makes the product appealing. Vishnu Sankar (Marketing) handles the marketing side of the startup.

We came together as a team and started working towards establishing the startup. We volunteered for few programs under IEEE organization in 2014. The event was a huge success, which marked our beginning as a team. Our first product idea, while in college, was a home automation system for energy conservation. Then we developed a design for wireless charging of implantable medical devices. Personal experiences with disability led us to an idea for an external device, an exoskeleton, for walking disabilities.

I believe in science and I believe in defying luck and fortune with science and the talent to make things happen that the Almighty has showered upon. At the point when people gained dialect the evolutionary baton was passed to us. When that happened transformative advancement ended up reliant on mankind's capacity to find, reproduce and spread the examples that lead to advance. Sometimes, living doesn't always depend on there, I believe living depends on what good we can do to our kind. With all the will and power in hand, I ought to do something for the betterment of the society.

We still believe that together we can make a difference. And we are never going to stop dreaming. We dream on achieving more.

Celebrations and Togetherness-

A warm fleece over the cold

As the nights get longer , darker and colder, there is a festival in Germany that puts a bright smile in the faces of children and adults alike.. The lantern fest known in german language as 'Laternenfest' is a spectacle of beautifully decorated lanterns made out of colored papers and craft items.. In kindergartens and schools, kids or parents meticulously work to create these beautiful lights in various shapes and sizes and carry them singing songs as a procession (Laternenumzug) on or around November 11th. This is usually accompanied by a get together that includes music, food and drinks.. This tradition is associated with St.Martin's day, the remembrance of the Saint who shared his coat with the poor.

Nikolaustag is celebrated on the 6th of December during the Advent time leading to Christmas. Children wake up to find decorated socks and boots filled with surprise gifts as Saint Nikolaus who is believed to deliver presents visited them during the hours of night.

Even as the temperature sinks further, the spirit of Christmas is kept alive by numerous Christmas markets throughout Germany. People gather in these markets especially to savour Glühwein (mulled wine/hot and spiced wine) and the country's favourite Wursts (sausages of different kinds) and to spend beautiful moments with Friends and Family..Lights and music all around, it's a treat to watch, indulge and enjoy. Accompanied with or without snow, the frolics of Christmas give way to 'Silvesternacht' (New Years Eve) when people wish each other a 'Guten Rutsch' (Good Slide or Safe Travel) to the New Year along with colorful celebrations and fireworks!

Before the Winter wraps up giving way to the cozy warmth of spring, the German streets get adorned by the spectacular colors of Karneval (especially popular is the Cologne Carnival). People dress up in different kinds of elaborate costumes, masks and parade the streets proclaiming unity and celebration. This was also traditionally considered as the time of indulgence before the onset of Lent season.

Wherever we are in this world, celebrations bring us together. In this era where people get too busy in the digital world, these chances for togetherness shine as beacons and reminders of the need to foster unity and peace across the world..Let's remember that our life is marked not just by the selfies we clicked but the moments that touched our heart...

'SHARE & CARE'
Socially distant physically,
knit together mentally
ORGANIZED BY VIMAL JYOTHI ENGINEERING COLLEGE
ALUMNI ASSOCIATION

In this festive season of
Easter, Vishu & Ramzan,
let's reach out to a
Corona struck society

**DONATIONS ACCEPTED FROM
APRIL 1 - APRIL 9**

The donations will be used to buy
Rice and other essentials to the
orphanges and care homes in and
around Chemperi

YOUR CONTRIBUTIONS CAN BE SENT TO THE FOLLOWING BANK ACCOUNT:

Acc. No: 42503070001223

IFSC Code: CNRB0014250, Branch: Nellikkutty, Acc. Holders: James & Grace
