and January, 2023

The group discussion was conducted on 31st January 2023 to discuss about the topic 'Life without Phone'. 'Telephone' the greatest and most useful invention for all time was only the mode of communication between two people. But technology kept on upgrading itself and so did the functionality of the phones. The old age phones became the new era's smartphones. And today a smart phone is performing most of our tasks directly and indirectly. Smartphones working is not limited to calling anyone. It became the mode of business, education, entertainment, and this dependency on smartphones become a problem as of now, we cannot imagine our life without the phone.

Overall the discussion was positive because each one of us contributed good information and everyone listened with interest when other members were sharing their ideas.
