Having more that 50 students in each class, is making teachers difficult to teach and students difficult to clear doubts and understand concepts. In my opinion, a class should only have 20-30 students (as its an engineering college).

The online class for problematic papers are so difficult to understand.The overall quality and effectiveness of online class is average. Should try more effective methods for problematic papers. The recorded videos of the class should be posted anywhere like YouTube or should be shared through WhatsApp. The online communication through Google meet can be continued. The recorded videos of class will help the students to revise the topic themselves. There should not be continuous hour of class like the timing from 9am to 1pm the online class hours should be restricted to Maximum 3 hrs. These are main suggestions to change from the existing method.

For theory subjects, the teaching method like spoon feeding may cause difficult for the students in their future while attending interviews and all. I have a request is that to minimize a little of these type of teaching. As in this pandemic situation the books (link of the required books / pdf for reference) should be given by the concerned faculties.
